

Declaration of the lack of asbestos in the manufacture and packaging of products supplied by Orolia Ltd

In accordance with International Maritime Organization (IMO) Res. MSC.282 (86), adopting SOLAS Reg. II-1/3-5.2, the installation of materials containing asbestos on all ships (both new construction and existing vessels) is prohibited after 1 January 2011.

In accordance with the IMO MODU Code 2009, asbestos is not to be used. The code is intended to apply to mobile offshore drilling units the keels of which are laid or which are at a similar stage of construction on or after 1 January 2012. The 1989 MODU Code (the "present code") preceded even the July 2002 SOLAS limitations on use of asbestos.

As there is no definition of asbestos in SOLAS or the MODU Code, we are guided by the definition of asbestos that refers to the SIX mineral names with "Chemical Abstracts Service" (CAS) numbers which are consistent with OSHA's, the EU's and USCG/EPA's definition of asbestos:

1. Actinolite CAS 77536-66-4
2. Amosite (Grunerite) CAS 12172-73-5
3. Anthophyllite CAS 77536-67-5
4. Chrysotile CAS 12001-29-5
5. Crocidolite CAS 12001-28-4
6. Asbestos Tremolite CAS 77536-68-6

The undersigned warrants that none of Orolia Limited's products contain asbestos.

This declaration specifically includes the following products:

1. Sailor SART II
2. Sailor 5051 AIS SART
3. Sailor SE406-II EPIRB, V2
4. Sailor SGE406-II GPS EPIRB, V2
