18th May 2018

Attn Henrik Moller, Cobham SATCOM

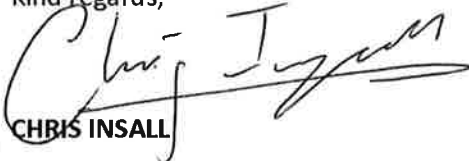

We are glad to provide herewith formal confirmation of our previous communication as follows:

- The qualification testing of the following antenna systems undertaken in February 2018 was confirmed as successful, meaning these antenna systems may now be used by contracted Service Providers to deliver commercial services on the IntelsatOne Flex maritime platform.

* 407060A SAILOR 600 VSAT Ku	-	65cm reflector size
* 407080A SAILOR 800 VSAT Ku	-	83cm reflector size
* 407090B SAILOR 900 VSAT Ku	-	103cm reflector size
* 407090E SAILOR 900 VSAT High Power	-	103cm reflector size

We look forward greatly to further successful cooperation with Cobham SATCOM going forward.

Kind regards,

CHRIS INSALL

Senior Principal Product Manager, Maritime Services

Intelsat

Notes:

1. Please note that the terms of usage for this service are described fully in the IntelsatOne Flex Service Order documentation.
2. This statement does not indicate any guarantee from Intelsat that further development is **not** needed by the manufacturer to deliver services on the IntelsatOne Flex platform.
3. Before conducting public communication relating to Intelsat antenna qualification, manufacturers should first consult Intelsat regarding approved communications guidelines, logos etc.
